

## **Pre-K and Kindergarten**

Explore ***A Time for Science*** and learn about nature through seasonally based programs. Students learn about plants, animals, colors, numbers, the alphabet, matching, taking turns, and safe ways to enjoy and respect nature. Choose from:

 Winter Wonderland

 Spring into Nature

 Fall Frolics

Each program will consist of a nature hike in which students will observe toy (but realistic) stuffed animals that have been placed along the trail in natural poses. The students will stop at each animal and learn about that animal's home, food source, life cycle, and other fun facts and hear stories about the animals.

We also offer a play area where students use natural or recycled materials to build, engineer and have fun!
